

Credit Name: CSE2130 - File Structures & Exception Handling
Assignment Name: WordGuess

Understanding the Problem

How did you approach understanding the challenge?

Were there any parts of the problem you found confusing at first? If so, how did you resolve that confusion?

I understood what the problem was asking. I knew I had done the WordGuess program in Chapter 5 from last year, so I had hoped I could recycle a lot of the code from there.

Planning the Solution

Did you create a plan or break the problem into smaller steps before coding?

How did you decide on the tools, data structures, or algorithms to use?

When I initially started the project, I wasn't too confident with my understanding of how some of the file structures worked. Since the template you had given us had commented instructions, I just kind of hoped I could follow along and recycle the code from both my previous WordGuess program and code from Stats1 and Stats2.

Implementation

Did you write the code in small pieces or attempt the entire solution at once?

How did you test your solution along the way to make sure it was working?

As I followed the comments, I recycled the code I thought was necessary. I basically just went top to bottom and added code wherever there were comments.

Overcoming Challenges

What part of the problem was the most difficult for you?

How did you handle moments when you felt unsure of what to do next?

Since I was just recycling code, I didn't run into many problems. The one major issue I found was an issue where when I guessed a letter, instead of printing the new word with the revealed letters (ex: C----), it was trying to print a letter and a null value (ex Cull----). I wasn't sure where the problem was since there were no errors being returned, and I didn't have a strong understanding of the file structures. Because I encountered this problem at home, I decided to ask ChatGPT to find the problem and explain the issue to me.

Learning

Was there anything you learned that you think will help you with future challenges?

After I was done with the project, I also asked ChatGPT to add comments to the MyFile and Stats projects to help me better understand how the file structures worked. Overall, I feel like my understanding of file structures and exception handling have improved.
